EDUCATION

Johns Hopkins Carey Business School (JHU) Master of Science in Business Analytics and Artificial Intelligence \$30,000 scholarship • Relevant Coursework: Advanced Business Analytics, Data Analytics, Advanced Database Management, Data Visualization, Practical Machine Learning, Generative AI, AI-Driven Sequential Decision Making, Simulation for Business Applications, Financial Decisions & Investment Analysis	Washington, DC Expected Jul 2026
University of Wisconsin–Madison (UW-Madison) Bachelor of Arts in Economics Certificate in Education and Educational Services • GPA: 3.65/4.0 (Top 5%); Dean’s List: Fall 2021-Fall 2022, Spring 2023-Fall 2024	Madison, WI Dec 2024

PROFESSIONAL EXPERIENCE

World Salon Research Intern, Department of Research • Leveraged a Python/Conda-based crawler workflow to collect, clean, and standardize 200+ executive profiles weekly, converting unstructured public information into decision-ready datasets for stakeholder mapping and program planning • Analyzed cross-industry topics across ESG, tariffs, healthcare, IT, textile machinery, and digital transformation; developed topic frameworks, guest profiles, briefing notes, and promotional materials, including for <i>Navigating the Digital Age</i> • Orchestrated 1–2 weekly business forums with 4–6 speakers each, including the ICAS North American Tariff Policy Forum with 50+ participants and a flagship two-panel forum with 16 speakers; aligned agendas, speaker positioning, and event narratives with business priorities	New York, United States Feb 2025 - May 2025
Jones Lang LaSalle (Beijing) Consultants Ltd, Shanghai Branch Analyst Intern, Department of China Valuation and Risk Advisory • Prepared cash flow, NPV, and IRR valuation inputs by extracting, refining, and reconciling 8–10 daily system outputs into Excel-ready datasets for commercial property valuation analysis • Compiled asset-level datasets for 30+ warehouse properties, covering vacancy, rent, size, construction status, and location; integrated inputs from databases, open-source research, and market calls for due diligence analysis • Audited three years of financial reports from 40 real estate companies to confirm external auditor information, including EY, Deloitte, KPMG, and PwC; strengthened benchmarking accuracy and cross-office business analysis • Created a one-page data dictionary and color-coded QA tracker defining field names, units, confidence levels, and status categories; improved data traceability, workflow efficiency, and cross-team consistency	Shanghai, China Jun 2024 - Jul 2024
Shanghai Pacific Securities Co., Ltd Macroeconomic Research Intern, Department of Macro Research • Built Excel-based visualizations of CPI/PPI and trade data from authoritative financial databases for weekly macroeconomic reports and client-facing market briefings • Performed regression and time-series analysis on silver pricing, synthesizing supply-demand drivers, macro indicators, and policy factors into an analytical research report • Translated government policy documents into analytical frameworks and mind maps, identifying implications for local government debt risk and macroeconomic decision-making • Managed publication workflow updates by editing report content, refreshing data tables, and checking figures for industry reports distributed through the firm’s official channels	Shanghai, China Jun 2023 - Aug 2023

PROJECT EXPERIENCE

Olist Marketplace Data Quality & Decision-Ready Analytics System Independent Portfolio Project • Built a reproducible analytics pipeline for a 9-table marketplace dataset covering 99K+ orders, 112K+ order items, 103K+ payment records, and 99K+ reviews; corrected join-grain, geolocation duplication, and customer-identity issues before producing dashboard-ready analytical outputs • Designed SQL validation checks, a business-facing data dictionary, and a QA tracker to make KPI definitions traceable and defensible; identified that a naive raw join would overstate product revenue by ~4.5% and cash collected by ~26.9% • Developed an executive Tableau dashboard and analysis report using corrected GMV of R\$13.59M and net product revenue of R\$13.22M, with findings on delivery-risk signals, category/geographic concentration, 3.12% repeat-customer rate, and AI-assisted review topics validated with topic $\kappa = 0.81$ and sentiment $\kappa = 0.89$	May 2026 - Jun 2026
Inventory Anomaly & Restocking Agent Generative AI Project Project Coordinator / Integration Lead Top-Five Team Ranking • Co-developed an agentic AI inventory decision-support prototype using LangGraph, ReAct-style reasoning, SQLite, and four read-only Python tools on a synthetic retail inventory database spanning 180 days, 50 SKUs, 6 locations, ~44K inventory snapshots, ~44K sales records, and ~2.2K purchase orders • Designed and integrated verifier-checked, advisory-only workflows that retrieve inventory status, calculate demand/turnover metrics, classify operational anomalies, and generate evidence-grounded restocking recommendations without executing purchase orders or modifying source data • Led final report, demo-script, and code-output integration across architecture, tool execution, failure handling, and evaluation sections; validated the system with 24 test cases covering prompt injection, excessive agency, invalid identifiers, conflicting data, data-quality warnings, and synthetic verifier rejection	Apr 2026 - May 2026
QUODD Corporate Action Adjustment Integrity Framework Analytics Consulting Project Project Coordinator / Integration Lead Top-Five Team Ranking • Consolidated three anomaly detection modules across 18,923 securities, integrating factor mismatch, timing error, and missing or unchanged adjustment outputs into a sponsor-ready prioritization framework • Synthesized anomaly outputs into an executive-level issue taxonomy, classifying 2,159 pure timing issues, 1,965 mixed issues, and 1,078 high-priority securities to support client review and defensible decision-making • Managed cross-workstream execution for a five-member analytics consulting team, tracking deadlines, sponsor-facing communication, and final deliverable integration, contributing to a top-five team ranking	Mar 2026 - May 2026

ADDITIONAL INFORMATION

Technical & Analytical Skills: SQL (Oracle SQL Developer), Python, R, DuckDB, SQLite, Tableau, LangGraph, ReAct, Excel Modeling, Data Cleaning, Data Validation, Data Quality, Data Modeling, KPI Definition, Dashboard Design, Regression, Time-Series Analysis, Decision Modeling
Business & Communication Skills: Financial Modeling, NPV/IRR, Market Research, Due Diligence, Data Storytelling, Executive Reporting, Stakeholder Communication
Leadership: Head of Chinese Radio Station, UW-Madison; led 5 events, secured \$1K sponsorship, recruited 18 members
